

Frame Center's Guide For Mirror Hangers

Do Not Wire!

We did not put a wire on your frame because it is our professional opinion that it would be unsafe!

Your Measurements

* Double check measurements provided

What You'll Need

- Pencil
- Hammer
- Hooks (provided)
- Level
- Painter's Tape (optional)

Hold your frame up to the wall and with a pencil mark the top center of where you would like your frame to sit.

Using the measurements provided above, mark the points where your D-rings will sit on the wall.

Make sure that your two points are level. Using a strip of painter's tape may help.

When hammering the hooks into the wall make sure that the bottom of hooks sit on the points that you made.

Slide the D-rings of the frame over the hooks making sure the frame is securely placed before letting go.
