

Frame Center's Guide To Wall Buddies

What you need

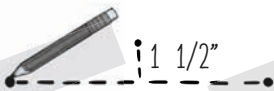

- Pencil/painters tape
- Ruler/tape measurer
- Level
- Hammer
- Hooks (provided)

Hold your frame up to the wall where you would like it to hang and mark the top center spot with a pencil or painter's tape.

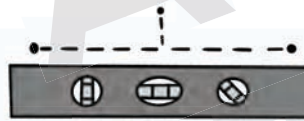

Measure the distance between the 2 downward pointing arrows on the wall buddies.

From the mark you made on your wall measure down 1 1/2" or the height from the top of your frame to the arrow on the wall buddies.

Then mark two points for the measurement you got in the last step using your first mark as the centerpoint.

Make sure your marks are level on the wall.

Hammer your hooks into the wall. Make sure that the bottom of the hooks are resting on the marks you made.

Slide the wall buddies up and over the hooks. Make sure it is secure before letting go.

Make sure your frame is level on the wall.

Share your new frame online and be sure to tag us!
